## HORDISAN

### Trace element mixed fertiliser for barley and cereals

**Hordisan** is a foliar fertilizer with manganese, zinc and copper. It is specially designed to meet the autumn requirement of trace elements of wheat.

#### Application and dosage:

Winter barley: in autumn 1-2 kg/ha.

Winter cereals: in autumn 1-2 kg/ha.

#### Miscibility:

This product can be mixed with all known plant protection products, however, we recommend performing a miscibility test before using.

#### Packaging:

10 kg

#### Composition:

Water-soluble copper (Cu): 5%

Water-soluble manganese (Mn): 20%

Water-soluble zinc (Zn): 10%
